wattyl® x caesarstone®

Comforting Neutrals

Organic hues with poetic charm.

Colour Tip

Choose natural hues for other finishes, from cabinetry to flooring, for a balanced result, where nothing competes.

The raw neutrals of Confetti Shower and Tipi create the perfect canvas for the statement-making Caesarstone Calacatta Maximus.

caesarstone
Arabetto™

polytec
Plantation Ash

polytec
Verdelho

An inspired colour palette that has at its heart the whisper quiet neutrals of Winter Mushroom and Gretna. Together they balance the dynamic veining of Caesarstone Arabetto - with Smoked Jade adding warmth and character.

Colour Tip

When creating a cohesive palette of colours and finishes, ensure there is overall balance by checking the undertones of each element.

Harmonic Wonder

Muted silver, putty & moss...

Onyx Vessel in White, Addition Studio. Serving Board in Oak by Skagerak, Designstuff. Glide Gourmet Knife by Anita Dineen, Top 3 by Design.

INTERIOR

The Aromatic Blend

Earthy, dynamic, stone & spice.

6

Colour Tip

Warm, rich, organic hues, such as Mombassa Grass, take on new meaning when complemented with other decorative elements in natural materials such as timber, terracotta and stone.

The raw linen hue of Ice Volcano is enriched by the earthy ochre of Mombassa Grass, enhancing the natural elegance of Caesarstone Aterra Bianca.

How to get colour right

The right colour combinations can look
flawless, fresh and finished.

Understand the Undertone

Look closely at the permanent fixtures in your space and get up close and personal with them. You'll start to see the undertone and get a feel for which colours sit together harmoniously.

Study and Compare

Visit a Wattyl Paint Centre for white swatches that have a similar undertone and take them home to compare. Look at them against each other, against your Caesarstone® samples and even a plain

sheet of white paper. Look in different lights, at different times of the day. You'll start to see the undertone and get a feel for which sit harmoniously.

Test the Best

Purchase a test pot or two of the colours you feel most confident about and paint them onto a piece of white card, or on your wall. Watch them, live with them, accessorise them, light them and make sure you're truly happy with your final choice.

Caesarstone is Australia's premier brand and global leader of quartz surfaces. We don't follow trends in colour and design. We set them. Our design team produces unique designs that not only set the trend but stand the test of time.

polytec is an Australian decorative board and laminate brand. Forever the creative thinker, polytec invests in pioneering new product and range developments to equip cabinet makers, architects, designers and consumers alike with a palette that's contemporary, forward-looking and comprehensive.

Due to limitations in the print process, colours shown may vary from the actual paint colour. For a more accurate representation, always check your colour choice against a Wattyl colour swatch. To ensure a correct match for your Wattyl colour selection.

Don't worry, it's wattyl®

With a reputation for innovation and performance throughout its 106 year history, Wattyl continues to create the most sophisticated finishes, textures and protective coatings for our Australasian residential and commercial buildings.

Wattyl I.D. Advanced interior paint delivers unrivalled protection for surfaces - and safety for occupants - with an ultra-low VOC formula, mould and fungus resistance. It also features advanced cleanability, washability, stain resistance and virtually no odour. Independent testing reveals it far exceeds green building requirements.

Wattyl Solagard durable exterior paint has been specifically developed to withstand our harsh weather conditions. Its Total Protection Technology ensures it resists flaking, peeling and blistering to keep all exteriors looking better for longer.

Wattyl Granosite has been a leading specialist in architectural texture coating since 1952. Its sophisticated, complete coating system is designed to meet the many challenges of evolving substrates and construction techniques.
